

**PATENT**

Attorney Docket No. 61938

Express Mail Label No. EV 334813625 US

**ABSTRACT**

- 5 A single tool for facilitating any or all of marking, scoring or cutting building materials, for example, planar building materials, including drywall, sheetrock, plywood, paneling, siding, insulation board and laminates, includes a head that receives a body. The head includes lateral sides that extend beyond the body; each of these sides typically having at least two wheels. The body includes an edge, oriented perpendicular to both the head and the plane formed by the tangents of the lowest points of the wheels. This
- 10 edge includes notches at intervals along it, for receiving instrumentation for the aforementioned marking, scoring or cutting of planar building materials.
